

Does your child display emotional or behavioral distress?

Children's Bureau Can Help.

In response to COVID-19, mental health services are being delivered to children and adolescents ages 0 to 21 (and their families) via telephone and video conferencing (telehealth). We're also making it easy for families to review and sign paperwork electronically. As always, our services are delivered with care and privacy.

Concerning behaviors in children and adolescents:

- Social withdrawal
- Anxiety, extreme fears or phobias
- Irritability
- Frequent sadness/crying
- Difficulty concentrating
- Anger outbursts/fighting/tantrums
- Signs of drug/alcohol use
- Drop in school grades
- Defiant behaviors (rebelliousness, difficulty following rules, or disrespecting authority figures)
- Lived a traumatic experience (i.e. sexual abuse, domestic violence, loss of a family member, accidents, etc.)
- Hyperactivity
- Relationship problems

How We Can Help

We partner with parents, caregivers, and families to support your child and/or adolescent. We offer a wide variety of culturally competent treatment options including mental health evaluations, individual and family therapy, group therapy, medication support, and assistance with community services and resources. You will find comfort in knowing that we provide evidence-based practices that have been proven to be effective interventions through scientific research.

We accept Full Scope Medi-Cal.
